

WOVEN FOAM & POLYETHYLENE

Starnet combines starfoam with polyethylene woven poly for tear-proof foam packaging. Due to its woven fiber construction, starnet is extremely resistant to punctures and tears. This makes starnet an ideal exterior packaging material. Starnet can be used many times, reducing cost, and its woven film laminate is tear and puncture resistant.

FEATURES & BENEFITS

- Non-abrasive material provides excellent surface protection and will not scratch or damage finely finished surfaces
- Lint and dust free foam can be safely used to protect highly sensitive products
- Closed cell construction means Starnet repels moisture and is inert to water, grease and solvents (below 130°F)
- Woven film laminate is tear and puncture resistant, resulting in better product protection and reduced cost
- Can be reused many times

MARKETS

- Automotive parts / equipment
- Furniture
- Heavy metal parts
- Playground equipment
- Sporting goods

AVAILABLE SIZES

PRODUCT	THICKNESS	BUNDLE WIDTH	BUNDLE LENGTH
